

Four Things You Didn't Know Were on the Caterpillar Contract

Of course it's obvious that the Caterpillar contract includes machines; however, with the latest renewal more options have been added to make the contract even more useful to your agency. Talk to your local Cat dealer to find out more.

▶ Service

Whether for maintenance or repair, Cat dealers are well equipped to meet your service/labor needs. As an NJPA member, you can get the work orders started as soon as you need service. Or plan ahead and sign up for a service/maintenance contract.

▶ Parts

Genuine OEM parts are the best option to keep your machines running for a long and productive life. Your local Cat dealer has the best parts availability in the industry and they can accept POs using your NJPA member number.

▶ Rental

Sometimes you need a machine for just a short time so rental might be the best solution. Your Cat dealer has a full line of equipment available to rent for short- or long-term needs. From light towers, to wheel loaders, your Cat dealer has you covered.

▶ Used

Good used machines can be an excellent value. The NJPA contract ensures you have access to this buying option if you decide it's right for you.
